Note: Inspection must not take place more than 5 days prior to traveling to avoid re-infestation.

1. Scrap egg masses from their locations with a putty knife, stiff brush, or similar hand tool.
2. Dispose of egg masses and other life stages in a container of hot, soapy water, or place them in a plastic bag, seal it, and set it in the sun.
3. You can choose to get rid of articles if they are heavily infested and have little value to you.
4. Keep the checklist as an official certificate. Be sure to enter the date and place inspected, and then sign at the bottom.

Give the inspection document to the driver to be presented to officials if stopped.
